GUIDANCE + PARTNERSHIP

Planning is the key to a safe jobsite. We specialize in answering all your construction safety related questions and help guide your company to pass all safety enforcement and compliance inspections.

TESTIMONIALS

"The class was thoroughly explained and I learned new things I had no knowledge of and I've been in the construction field for 3 years already. Feliks and Edwin and the two most attentive trainers I've ever met and they take their teaching seriously! I'd give 10 stars if I could!!"

"Mr. Feliks is the man! A great instructor, very understandable, and very knowledgeable. I recommend him for the classes you need and you can't forget about Mr. Edwin - another great, knowledgeable instructor. Thank you guys for your knowledge and courses!"

"The training was brief yet detailed and well executed. I would recommend to anyone looking to get any construction safety certification. Feliks is extremely experienced and knowledgeable and will answer any questions you may have."

"Quick and super efficient on getting my 30 hours OSHA training. I will definitely be back to complete the extra hours for the supervisor. I am really pleased with the whole process from being able to register online and finding the well situated location."

"The Site Safety Plan prepared by ABC Safety Group was inspected by over a dozen different inspectors throughout the construction of my 6 story buildings, and it passed inspection every single time. The amount of safety details presented in this site safety plan does not compare to other safety plans I've used in the past. This plan saved me thousands of dollars of violations. Thank you ABC Safety Group! I wouldn't look anywhere else for a Site Safety Plan."

- Bill N., NYCDOB Licensed Construction Superintendent

"As a NYC Contractor who does not want to deal with getting stopped for safety violations, we hired ABC Safety Group to manage our construction superintendent service needs. We were amazed how the team at ABC Safety Group was always one step ahead of the DOB inspectors. Just to share one example, our construction superintendent warned us that DOB inspectors are giving out violations for not having cold form steel specifications onsite. We got those specifications right in time for the Compliance inspection by DOB and passed! We saved money and time by hiring ABC Safety Group. They are an excellent investment in your construction projects' safety program."

- Sal R., NYCDOB Licensed General Contractor

"We experienced only the highest attention to detail when it came to working with ABC Safety Group. They came through for us in the critical moments of our projects. They always tried their best to help guide our team of construction managers in the right direction. Thank you ABC Safety Group, we couldn't have completed the project so smoothly without your help."

- Nathan A., NYC Developer
